

E-News—New Look!

We hope you like our new look. It is accompanied by a change in distribution. You will now receive the English and French editions separately. This change will allow Horizons to feed automatically onto the Fundy Model Forest website and into the Canadian Model Forest Network RSS news feed. Information about FMF activities and products will be sent instantly to the Network, making distribution of news smoother and faster. There is lots of activity at the Fundy Model Forest. We will now be able to deliver more timely updates with the e-News appearing in your Inbox at least once a month. You must subscribe to both the English and French editions to continue receiving the newsletter.
