Appendix A – Independent Financial Audit

### Introduction

The past five years have been difficult ones for the forest industry and the communities it supports. The "perfect storm" -- a combination of high energy costs, the softwood lumber dispute with the United States, a high Canadian dollar, increased competition shifting demand for traditional commodities (especially newsprint), and wood shortages -- have all conspired to create challenges like no other period in the industry's history. Mill shutdowns have become the norm in Canada.

The changes that have occurred in the forest industry can no longer be considered cyclical. While some of the trends will improve, the industry is fundamentally changed. Slow downs, mechanization and other factors have reduced the economic and social benefits flowing to, primarily, rural communities.

Over the past 150 years, the forest industry has been the economic engine of New Brunswick. The Province has traditionally relied upon its ability to generate wealth to create spin-off industries and jobs. Currently, 11.2% of New Brunswick's gross domestic product is generated by the forest industry (New Brunswick Forest Products Association, second only to British Columbia in Canada).

Like other provinces in Canada, New Brunswick is becoming more urban. The population has been moving to urban areas to take advantage of work and cultural opportunities. However, a large proportion --50%' -- is still rural.

The combination of New Brunswick's rural nature and reliance on the forest industry as an economic engine has had broad impacts across the province. The impacts have been felt by heavy industry, private woodlot owners and those who rely on the flow of timber from those land bases. Some of the impacts being felt are: reduction in the number of logging contractors operating on private land, an exodus of skilled labour to other provinces like Alberta, a reduction in students applying to resource-based programs and a loss of youth in rural areas as they move to seek opportunities in other parts of the country.

This document represents the activities in the Fundy Model Forest (FMF) for the one year period from April 1, 2007 to March 31, 2008. This report has two components: the first 6 months of the fiscal year which was an extension to the Phase III contribution agreement with the CFS and, the final half of the year which represent the first six months of the Forest Community Program.

Over the past year, there has been increasing pressure on forest dependent communities: with the majority of processing facilities closed temporarily or permanently. The past year the FMF has:

- > Ensure efficient administration of the funding and programs associated with the FMF,
- > Deliver projects that contribute to the knowledge and education of our partners,
- Identify potential partners
- Moved forward with the Community Futures and Research, Innovation and Science programs.

### **Projects Summaries**

The following Reports on projects completed by the FMF in the 2008-2009 fiscal year

Project Number: WGS08(08)-01	Start: April 2008		
Project Title: Administration		Completion: March 2009	
Project Leader: Nairn Hay		~	
Purpose:			
The governance process has been e	stablished for the next five	e years based on the H	MF Bylaws and
our Contribution Agreement with C	CFS.		
Description:		-	
• BOD, AGM, Executive meetin	gs, Workplan, Financial A	udit and Annual Rep	ort
• Office administration including	g: financial accountability,	support of partnershi	p and
infrastructure associated with F	<sup>-</sup> CP	_	_
Budget:

### **Activity Area 1 - Communications**

Start: April 2008 Completion: March 2009

Project Title: Communications Project Leader: Barb Scott

#### Purpose:

To communicate the methods and innovations of the program to local, regional, national, and international audiences.

#### Description:

The project helped the FMF to extend its "reach" to existing and new partners through new media and collaboration tools.

Activities included:

- writing and distributing timely communiqués
- built new collaborative context between existing and new partners
- designed new tools and capabilities to website that supports collaborative activities
- supported the FMF Communications Committee

Budget:			
	Cash	In-kind	Total
CFS – core	\$54,730	\$500	\$55,230
CFS – other (if any)	\$0	\$0	\$0
Total CFS funding	\$54,730	\$500	\$55,230
Falls Brook Center	\$0	\$750	\$750

Project Number:	UFU0((	JO)-U.	2

Start: April 2008 Completion: March 2009

Project Title: Capacity for What? Understanding and Building Community Capacity in New Brunswick's Forest Communities

Project Leader: David Bruce – Rural and Small Town Programme, Mount Allison University

#### Purpose:

There was much discussion about "building capacity" in project and program activities, but there was very little understanding of what was meant by the term "capacity", especially in a rural context. In addition, there was often very little focus on making direct and explicit connections between:

- Activities which can or do build capacity;
- Which "capacities" are being built;
- For communities, organizations, and/or individuals; and
- What can be done with an improved or larger or new "capacity"

In this project the specific connections between these was identified and a menu of choices was created which allow communities and organizations to more readily identify what capacities can and should be built, how to build them, and what can be done with the newly built capacity.

#### Description:

The project addressed the challenges of "building capacity for what?" More specifically, the project involved a scoping of the capacity building literature and related outcomes, and work with three communities.

The objectives were to:

- 1. Assess current state of "capacity" with the four communities
- 2. Build capacity on identified items, monitor the progress and assess if and how built capacity is used.
- 3. Report on how capacity building can assist forest communities

Budget:			
	Cash	In-kind	Total
CFS – core	\$16,100	\$0	\$16,100
CFS – other (if any)	\$0	\$0	\$0
Total CFS funding	\$16,100	\$0	\$16,100
Regional Development Corporation	\$7,500	\$0	\$7,500
NB Enterprise Network	\$15,000	\$0	\$15,000
Total leveraged funding	\$22,500	\$0	\$22,500
Total funding	\$38,600	\$0	\$38,600

Outputs:

- A need assessment / diagnostic tool to assess capacities was piloted in Petitcodiac, Blackville, Plaster Rock and Perth-Andover
- Capacities were built on participant-identified items and monitored
- Final report summarizing the project objectives, methods, activities, findings, and transferability of the project.

Project Number: CF08(07)-10				t: January 2	
Completion: March 2009 Project Title: Forest Management Training for Woodlot Owners Project Leader: Jason Knox - SNB					
Purpose: The purpose of this project was to deliver Forest Management Courses to increase the knowledge of woodlot owners about woodlot management in particular and forestry in general.					
Description: INFOR Inc. developed training courses that encourage the use of Best Management Practices and outline regulations that apply to forestry operations, as well as focusing on other information that is useful to a woodlot owner managing their own forest. The courses have been reviewed by the provincial Sustainable Forestry Initiative (SFI) implementation committee and have been recognized by them as meeting all of their training requirements. SNB delivered these courses to woodlot owners in Southern New Brunswick. The course material was delivered by trained S.N.B. Field Staff and supplemented by supporting resource materials, guest speakers, audio- visual aids and group discussion. SNB staff was trained in the professional presentation of courses through the NBCC "Train the Trainer" course. This course will assist woodlot owners to achieve a deeper understanding of forest management considerations and decision-making activities on their woodlots.					
activities off their woodfots.					King

### Activity Area 3 – International Relations

No projects were carried out in this activity area.

Projects initiated in previous fiscal years and completed in 2008-2009

	ct duration:		t: January 2007			
	onths	Completie	on: March 2009			
Project Name: Awareness of Forest and Stream Ecology						
Project Leader: Robena Weatherly – Canaan Washademoak Environmentalists						
Purpose:						
The purpose of project was to increase ecological literacy and foster a stewardship ethic regarding						
our valuable natural resources. The propose			•			
continuing to develop and deliver new exper	iential and outdo	oor environmental edu	cation modules			
Description:						
There were two modules developed and deli	vered. They were	e:				
• Food Webs: Terrestrial and Aquatic	•					
• Winter Ecology in Forests and Strea	ms					
The project emphasized a constructivist and		roach to learning and	investigated the			
behavioral and physiological adaptations req	uired by animals	s and plants to survive	in a season			
that is a vital part of our Canadian heritage a	nd our traditions	•

### Table 8: Five-Year Budget Forecast/Summary

**Progress to Intended Outcomes** Table 4, 5 and 6 describes this fiscal years contribution to the FMF's immediate, intermediate and long-term outcomes.

Time Frame	Project Number	Contribution to objectives
<b>Immediate Outcomes</b> Clear Consistent Program Climate	ADM08(08)-01 WGS08(08)-01 CC08(07)-01	Transparent, efficient administration provide trust between the FMF and its partners and the FMF and funders
Accelerated and improved transfer of knowledge and tools to local, regional, national and international audiences	CC08(07)-01 CC08(07)-02 CC08(07)-03 CF08(08)-06 CF07(07)-05	<ul> <li>The workshop provided information on local, regional and national bioenergy technology and opportunities.</li> <li>A strong communication program and the implementation of the appropriate tools, accelerate the transfer of FMF knowledge and experiences via the multiple media.</li> <li>The outdoor experiential workshops offered to school age children are opportunities to transfer knowledge and experiences and to develop and test new communication tools.</li> <li>Membership in the CMFN acts as a means of disseminating information</li> </ul>

### Table 1 - Intended immediate outcomes

Time Frame	Project Number	Contribution to objectives
<b>Immediate Outcomes (continued)</b> Communities have increased access to data, information, and models to support decision making	CC08(07)-01 CF08(07)-01 CF08(07)-02 CF08(08)-08	The Asset Mapping tools and Community Capacity projects provide communities a process for stakeholder engagement and important data on the current status. Knowledge on their current status, gives them data on which to make more informed decisions.
Community members and organizations have increased capacity.	CC08(07)-01 CC08(07)-02 CF08(07)-01 CF08(07)-01	The Forestry Recruitment program promotes working in the forest sector and will result in increased capacity in the sector. The Asset Mapping tools and Community Capacity projects provide communities a process for stakeholder engagement and building community capacity.
New resource based opportunities for communities have been identified and are being filled.	CC08(07)-01 CF08(08)-04	Bioenergy is one of the cornerstones of building a sustainable future for rural communities. The use of bioenergy could be an important opportunity for NB communities.
Gaps in scientific and socio-economic knowledge have been identified and are being filled.	CF08(08)-05 CF08(08)-11 RSI08(08)-03 RSI08(08)06	Projects contribute to the new knowledge.

### Table 4 – Intended immediate outcomes (continued)

### Table 5 – Intended intermediate outcomes

Time Frame	Project Number	Contribution to objectives
Intermediate Outcomes Continuous program improvement and management	ADM08(08)-01 CC08(07)-01	Over the long-term transparent, efficient administration provide trust between the FMF and its partners and the FMF and funders and will expand the program.
The Knowledge and data acquired through the FMF is used to make decisions and inform policy making at the local, provincial, regional and national levels.	CF08(08)-04	The projects will provide knowledge, data and information on which future NB Government policy could and should be made.
Forest-based communities have the information and knowledge to make decisions about their socio-economic destinies.	CC08(07)-01 CF08(08)-09	All the projects associated with this objective will provide communities with information, data or processes to acquire information, knowledge and data for making decisions.
Knowledge and tools have been transferred to partnerships that are international.	CC08(07)-01	The FMF, through its International Relations theme area, is actively seeking international partners. The current projects will build the foundation for partnerships with organizations in Central and South America.
The FMF continues to attract a growing base of partners (traditional and non-traditional) to develop and access knowledge and data for application in their communities.		A strong communication program serves both current partners and is the best tool for communicating with and attracting new partners. The more who know about us, the more who will want to join us.

### Table 6 – Intended long-term outcomes

Time Frame	Project Number	Contribution to objectives
<b>Long-term Outcomes</b> The FMF is self sufficient and not dependant on any one source of funding.		Over the long-term transparent, efficient administration provide trust between the FMF and its partners and the FMF and funders and will expand the program to become self-sufficient.
Forest-based communities are better equipped to respond to forest sector transition issues and opportunities.	CF08(08)-07 CF08(08)-08 CF08(08)-09	All the projects associated with this long-term objective will provide communities with information, data or processes to acquire information, knowledge and data for making decisions.
Increased forest based economic diversity and growth in rural communities.	CF08(08)-04 RSI08(08)-01 RSI08(08)-01 RSI08(08)-04	The current projects provide information and data on which to base decisions on economic opportunities associated with the forest resource.
International recognition for leadership in sustainable forest management.		The FMF, through its International Relations area of interest, is actively seeking international partners. The current projects will build the foundation for partnerships with organizations in Central and South America where there will be opportunities to share data and information about SFM.

- organizations highlighted in yellow are government. The current stacking (government to non-government funding) is 57%

### **Organizational Structure**

### **Board of Directors**

Individual representatives on the FMF Board of Directors are senior members of their organizations. The Board of Directors facilitates the application of FMF. Listed below are members of the Board for the 2007/2008 fiscal year.

Mr. Jason Knox SNB Wood Cooperative Ltd.	Ms. Jane Tims NB Department of Environment and Local Government	Ms. Heather Hawker City of Moncton
Mr. Rob Anderson J.D. Irving, Limited	Mr. Ken Hardie NB Federation of Woodlot Owners	Dr. Alan Weatherley Washademoak Environmentalists
Mr. Willard Mallory Sussex Fish and Game Association	Ms. Anna Holdaway Fundy Environmental Action Group	Dr. Ron Smith Canadian Institute of Forestry
Mr. Robert Fawcett Fawcett Lumber Company	Dr. Alyre Chiasson Université de Moncton	Mr. Jack MacDonald Indian and Northern Affairs Canada
Mr. Gerry Gogan Village of Petitcodiac	Ms. Stephanie Coburn Conservation Council of New Brunswick	Mr. Gig Keirstead School District 6
Mr. Gerry Gogan Petitcodiac Sportsman's Club	Ms. Toni Paul Red Bank First Nation	Mr. Paul Chamberland Environment Canada
Mr. Edouard Daigle Fundy National Park	Mr. Ralph Carr Town of Sussex	Vacant NB Premier's Round Table on the Environment and Economy
Ms. Cathy MacLaggan NB Department of Natural Resources	Mr. Steve Ginnish Eel Ground First Nation	Mrs. Anita Hamilton Fisheries and Oceans Canada
Mr. Rudy Stocek Atlantic Society of Fish and Wildlife Biologists	Mr. Pat McCarthy Maritime School of Forest Technology	Dr. John Richards Canadian Forest Service
Mr. Gart Bishop NB Federation of Naturalists	Mr. David Sutherland Nova Forest Alliance	Ms. Janette Desharnais INFOR Inc.

Mr. Don MacVey Sussex and District Chamber	Dr. Dave MacLean University of New Brunswick	Vacar K.C.
of Commerce	Faculty of Forestry and	Susta
	Environmental Management	
Ms. Sandra Stockall	Dr. Graham Forbes	Mr. I
School District 2	Greater Fundy Ecosystem	Rems
	Research Group	
Mrs. Moranda van Geest	Dr. Kate Frego	
Elgin Eco Association	University of New Brunswick	
-	Saint John	

Vacant K.C. Irving Chair in Sustainable Development

Mr. Doug Jones Remsoft Inc.

### **Fundy Model Forest Officers**

Officers of the company, elected by the Board are:

President	Dr. Dave MacLean, UNB Faculty of Forestry and Environmental Management
Vice-President	Mr. Edouard Daigle, Fundy National Park
Secretary Clerk of the corporation, custodian of	Ms. Amanda Pieroway, Fundy Model Forest the seal and maintains all votes and minutes
Treasurer Custody of all funds and maintains fu	Ms. Amanda Pieroway, Fundy Model Forest Il and accurate records of accounts

#### **Executive Committee**

The Executive Committee is comprised of the following:

President	Dr. Dave MacLean
General Manager (non-voting)	Mr. Nairn Hay
Secretary (non-voting)	Ms. Amanda Pieroway
One seat from Natural Resources Canada (Ex-officio)	Mr. John Henderson

Four Landowner Seats	
J. D. Irving, Limited.	Mr. Greg Adams
Fundy National Park	Mr. Edouard Daigle
SNB Wood Cooperative	Mr. Jason Knox
NB Department of Natural Resources	Ms. Cathy MacLaggan

Five Elected sector representatives Education Environmental Public at Large Research First Nations

Mr. Gig Keirstead Ms. Stephanie Coburn Mr. Gerry Gogan Dr. Kate Frego Vacant

Ex-officio - FMF Staff members

#### Administration

Barb Scott

Dr. Dave MacLean, Dean of the Faculty of Forestry and Environmental Management at the University of New Brunswick, is the Chair and President of the FMF.

The FMF office staff consists of:

Nairn Hay, General Manager; Phone: (506)432-7563 Email: Nairn@fundymodelforest.net
